Bring your resume!

BIOS FOR INTEL REPRESENTATIVES

Dr. Jack Hwang, Engineering Manager

Jack Hwang is currently an Engineering Manager within Intel's Logic Technology Development Group. He joined Intel in 1994 after receiving a BS in Chemical Engineering at UC Berkley and a PhD from Caltech. Jack's hobbies include paddleboarding, windsurfing, and kite boarding.

Melinda Murdock, University Relations Manager

Melinda (Mindy) Murdock's career spans over 20 years at the Intel Corporation where she has held a variety of technical and recruiting positions. Mindy was hired into Intel's engineering leadership rotation program, upon completion of the program, Mindy began her career within Intel's Internet of Things (IoT) group where she held various technical and business development positions primarily working with IoT software ecosystems. While in IoT she was very active in University Programs and recruiting. This passion for recruiting led her to the position she holds today within the global talent organization where she is focused on finding the key, critical US College Graduate technical talent to meet Intel's global needs with an emphasis on PhD recruiting. Mindy holds a BS degree in Computer Science from the Rochester Institute of Technology.
