Participate in a new interdisciplinary project to design biodegradable materials for marine applications. The project is a collaboration between engineers, oceanographers, synthetic biologists, and industry experts. Students selected to participate in the project will work in the Santoro Lab during Winter/Spring 2022, followed by the opportunity to intern at Mango Materials in Summer 2022.

APPLICATION DEADLINE
November 10, 2021

TO APPLY: email resume + cover letter describing your research and career interest to Ofelia Aguirre aguirre@ucsb.edu

REQUIREMENTS
• Background OR interests in molecular biology, microbiology, material science, or marine biology.
• Full-time UCSB undergraduate

BENEFITS
• Training in microbiology and microbial genomics
• Training in scientific communication
• $500 stipend per quarter
• Priority consideration for Mango Materials 2022 Summer internship ($9,000 stipend)
